

Flood Control Dams in Oklahoma Senate District No. 23

Oklahoma has 2,107 flood control dams in 61 counties. These dams have been constructed through local units of government, mostly conservation districts, who serve as local watershed project sponsors. The USDA Natural Resources Conservation Service (NRCS) provided financial and technical assistance to sponsors to build the dams through Public Law 78-534 Flood Control Act (Washita River Watershed) and Public Law 83-566 Watershed Protection and Flood Prevention Program.

The primary purpose of flood control dams is to reduce flooding. The secondary benefits of the dams address a myriad of public needs such as water supply, water quality, soil health, water management, wetland enhancement, fish and wildlife habitat, and recreation. Flood control dams improve public safety, contribute to a healthy economy and support a strong nation.

Watershed projects also include the installation of conservation practices such as terraces, waterways, ponds, gully repair, and pasture and rangeland plantings. These conservation practices improve water quality and soil health and reduce sedimentation into the lakes formed by the dams.

Operation and Maintenance of Dams

The operation and maintenance of dams is the responsibility of the project sponsors. Operation and maintenance of dams can be expensive and labor intensive, but is necessary to ensure the dams function as designed and remain safe.

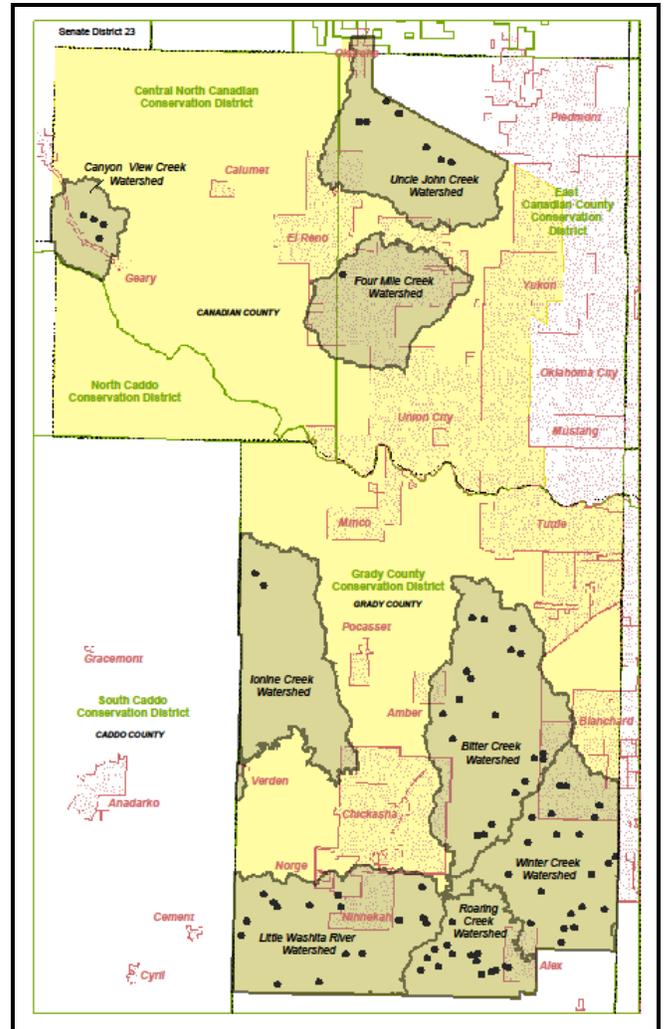

Maintenance work includes removing trees from dams and spillways, repairing erosion damage, repairing damage to spillways and dams after heavy rain storms, controlling beavers and rodents, and keeping the principal spillway inlet towers cleared of debris.

Operation and Maintenance Needs

An estimated \$6 million per year is needed to meet the operations and maintenance needs of the 2,107 flood control dams.

Annual Benefits

The 2,107 flood control dams provide \$85 million in average annual benefits. Listed on the back page are the average annual benefits from watershed projects in Senate District No. 23.

Rehabilitation and Dam Safety

Some dams will need rehabilitation to remain safe and protect the people that live or work downstream and to continue to provide benefits. There are 249 high hazard dams with 63 that meet current dam safety criteria either through original design or rehabilitation. It is estimated that \$653 million will be required to rehabilitate the remaining 186 high hazard dams to comply with federal and state dam safety laws.

More dams will become high hazard as long as residential and business development is allowed downstream of the dams in the breach flood area.

NRCS can provide 65 percent of the cost to rehabilitate high hazard dams. Local project sponsors provide 35 percent of the cost and obtain any needed additional land rights.

As of January 2015 thirty-four dams in the state have been rehabilitated to meet state and federal mandated dam safety regulations and 18 dams are in various stages of planning, design or construction.

Average Annual Watershed Benefits (Entire Watershed)

Watershed Name	Dams in Watershed	Dams in District 23	Monetary Benefits	Farms/Ranches Benefited	Bridges Benefited	Wetlands Enhanced/Created (acres)	Reduced Sedimentation (tons of soil)
Bitter Creek	19	19	\$384,570	150	13	217	49,257
Canyon View	4	4	\$99,689	24	3	72	12,513
Ionine Ck.	2	2	\$13,401	5	2	0	80,722
Four Mile Creek	1	1	\$807,177	35	9	86	18,325
Little Washita River	45	16	\$1,327,736	492	69	748	171,836
Roaring Ck.	40	15	\$1,004,906	199	12	290	59,373
Uncle John Creek	12	7	\$652,958	164	15	397	90,794
Winter Ck.	24	21	\$524,972	204	10	356	62,267
Total	147	85	\$4,815,409	1,273	133	1,877	545,087

Conservation Contacts for Oklahoma Senate District 23

Conservation Districts are a primary sponsor of most watershed projects in Oklahoma. The USDA Natural Resources Conservation Service (NRCS) is the federal agency that administers the watershed program and provides technical and financial assistance to the local project sponsors.

Listed below are conservation districts located in Senate District 23 that have watershed projects and other conservation agencies that can be contacted for more information about the watershed program.

East Canadian County Conservation District

1625 E. US Highway 66, El Reno, OK
405/262-1958
ecanadianccd@conservation.ok.gov

Grady County Conservation District

828 W. Choctaw Ave., Chickasha, OK
405/224-0523
gradyccd@conservation.ok.gov

Central N. Canadian River Conservation District

129 E. Main, Geary, OK
405/884-2383
cncrivercd@conservation.ok.gov

Oklahoma Conservation Commission

2800 N. Lincoln Blvd. Suite 160
Oklahoma City, OK 73105-4210
(405) 521-2384
