***G.6 & G.7 Tyler SIS Horizontal Pricing**

Tyler's SIS pricing is the same as is for G.4 & G.5. Tyler prices integrations as follows....

Tyler SIS has 4 methods for integration with other systems:

a) Existing Standard Integrations for many of the nationally marketed K-12 systems for Library, Transportation, Lunch, Assessment and other areas. These integrations can be activated and configured for where to send or receive this data. Districts can also use these exports for other systems that will accept this data when the content is much the same as what these other systems are wanting. There are no fees for using these integrations that are currently available to all our clients

b) Self-Service District created exports for student data where the target export file has 1 row per student. Many of the needed 'simpler' integrations can just be created by the district using our Student-data-grid tool and be scheduled to export nightly to a specific destination. There are no fees for using this self-service data grid tool or its scheduled export.

c) Tyler-SIS Custom Integrations. These are created for individual districts who need integrations with systems unique to their district or are not part of Tyler-SIS standard integrations. The

associated custom-development fees for these integrations are determined on the type of integration needed: export only / export-import and if Student Demographic type data only or includes Class-Rosters or other data-areas.

d) SIF (when districts have implemented a SIF integration server)

Note: Tyler-SIS also has internal Real-Time integrations with other Tyler Systems: Special-Education (IEP), Food-Service (Meal POS & accounts), VersaTrans (transportation system), Tyler Financial systems (Munis, Infinite Visions)
