Dear Mr. Gutwein:

I write in response to your letter to Dorval Carter with the Federal Transit Administration (FTA) requesting a determination by the FTA of whether the processes used by the Braun Corporation (Braun) to convert an incomplete Chrysler or Dodge minivan into the Braun Commercial Entervan are sufficient to meet the Buy America final assembly requirements. For the reasons outlined in the enclosed memorandum, I am pleased to inform you of FTA's conclusion that the activities that take place during Braun's conversion processes constitute final assembly for minivans converted for wheelchair access.

FTA appreciates your commitment to its Buy America rules. Paramount in FTA's role as a steward of U.S. taxpayer dollars is to ensure that the use of such funds preserves and creates U.S. jobs. The intent and purpose of the Buy America requirement is to further this goal by ensuring that FTA-administered funds are used to purchase goods that are produced in the United States. FTA's commitment to ensuring Buy America compliance has resulted in a dramatic reduction in the number of waivers it has granted, from 52 in fiscal year (FY) 2010, 14 in FY 2011, 3 in FY 2012, and zero in FY 2013. Upon reviewing your request for guidance, it is apparent that Braun shares FTA's commitment to preserving and creating jobs in the United States.

If I can provide further information or assistance, please do not hesitate to contact me directly at (202) 366-4040.

Sincerely yours,

Peter Rogoff

## EXECUTIVE SUMMARY

The Braun Corporation submitted a model Entervan; gasoline-powered 5 seat (including the driver) 16-foot converted Dodge Grand Caravan SE, for a 4 yr/100,000 mile STURAA test. The odometer reading at the time of delivery was 25.0 miles. Testing started on January 22, 2009 and was completed on April 3, 2009. The Check-In section of the report provides a description of the bus and specifies its major components.

The primary part of the test program is the Structural Durability Test, which also provides the information for the Maintainability and Reliability results. The Structural Durability Test was started on February 18, 2009 and was completed on March 6, 2009.

The interior of the bus is configured with seating for five passengers including the driver plus one wheelchair position. This converted Dodge Grand Caravan SE does not allow for free floor space; therefore the design does not allow for standing passengers. At 150 lbs per person, plus 600 lbs (wheelchair position) this load results in a measured gross vehicle weight of 5,920 lbs. The first segment of the Structural Durability Test was performed with the bus loaded to a GVW of 5,920 lbs. Due to no standing passengers, the middle seated load weight segment was performed at the same 5,920 lbs and the final segment was performed at a curb weight of 4,580 lbs. Durability driving resulted in unscheduled maintenance and failures that involved a variety of subsystems. A description of failures, and a complete and detailed listing of scheduled and unscheduled maintenance is provided in the Maintainability section of this report. **The test vehicle encountered no failures during the Structural Durability Test; therefore, no data is available in that section.**

Accessibility, in general, was adequate. Components covered in Section 1.3 (Repair and/or Replacement of Selected Subsystems) along with all other components encountered during testing, were found to be readily accessible and no restrictions were noted.

The Reliability section compiles failures that occurred during Structural Durability Testing. Breakdowns are classified according to subsystems. The data in this section are arranged so that those subsystems with more frequent problems are apparent. The problems are also listed by class as defined in Section 2. **The test bus encountered no failures during the Structural Durability Test; therefore, no data is available in this section.**

The Safety Test, (a double-lane change, obstacle avoidance test) was safely performed in both right-hand and left-hand directions up to a maximum test speed of 45 mph. The performance of the bus is illustrated by a speed vs. time plot. Acceleration and gradeability test data are provided in Section 4, Performance. The average time to obtain 50 mph was 15.36 seconds.

The Shakedown Test produced a maximum final loaded deflection of .080 inches with a permanent set ranging between -0.005 to 0.005 inches under a distributed static load of 2,475 lbs. The Distortion Test was completed with all subsystems, doors and

escape mechanisms operating properly. No water leakage was observed throughout the test. All subsystems operated properly.

The submitted test vehicle was not equipped with any type of tow eyes or tow hooks, therefore, the Static Towing Test was not performed. The Dynamic Towing Test was performed by means of a front-lift tow. The towing interface was accomplished using a hydraulic under-lift wrecker. The bus was towed without incident and no damage resulted from the test. The manufacturer does not recommend towing the bus from the rear; therefore, a rear test was not performed. The Jacking and Hoisting Tests were also performed without incident. The bus was found to be stable on the jack stands, and the minimum jacking clearance observed with a tire deflated was 2.9 inches.

A Fuel Economy Test was run on simulated central business district, arterial, and commuter courses. The results were 13.43 mpg, 14.36 mpg, and 23.54 mpg respectively; with an overall average of 15.64 mpg.

A series of Interior and Exterior Noise Tests was performed. These data are listed in Section 7.1 and 7.2 respectively.

Re: TVM DBE Goal Concurrence – Fiscal Year 2014

Dear Mr. Gutwein:

This letter is to inform you that the Federal Transit Administration's (FTA) Office of Civil Rights has received Braun Corporation's Disadvantaged Business Enterprise (DBE) goal and methodology for FY 2014 for the period of October 1, 2013–September 30, 2014. This goal submission is required by the U.S. Department of Transportation's DBE regulations at 49 CFR Part 26 and must be implemented in good faith.

We have reviewed your FY 2014 DBE goal and determined that it is compliant with DOT's DBE regulations. You are eligible to bid on FTA funded transit contracts. This letter or a copy of the TVM listing on FTA's website is documentation that may be used to demonstrate your compliance with DBE requirements when bidding on future contracts.

FTA reserves the right to remove/suspend this concurrence if your DBE program or FY 2014 DBE goal is not implemented in good faith. In accordance with this good faith requirement, you must submit your DBE Uniform Report in the DOORS system by December 1, 2013. This report should reflect all FTA funded contracting activity for the second period of FY 2013 (i.e., from April 1 to September 30).

Please also be mindful that your FY 2015 DBE goal methodology must be submitted to FTA by August 1, 2014. Therefore, you should publish your goal on or before June 17, 2014. Thank you for your cooperation. If you have any questions regarding this approval, please contact Britney Berry at (202) 366-1065 or via e-mail [britney.berry@dot.gov](mailto:britney.berry@dot.gov).
