C.5.17. Description of Current System and Technology Requirements:

~~C.5.17.1. DOC uses an integrated system to manage inmate trust fund accounts and canteen operations called the Offender Banking System (OBS). The OBS tracks inmate account balances and system transactional data for inmates and manages separate UPC codes for items sold through the department's 17 facility canteens. Detailed OBS transactional data is reported daily to the State of Oklahoma's statewide financial system through an electronic interface and reporting process.~~

~~C.5.17.2. DOC acquired and modified the OBS through a developmental contract with a private supplier, Centric Group (CG)/Advanced Technologies Group (ATG). The supplier's licensing agreement provides that ATG "retains sole and exclusive ownership of all right, title and interest in and to the SOFTWARE, all copies thereof, all modifications and enhancements thereto (including ownership of all copyrights, and other intellectual property rights pertaining thereto) subject only to the right and license granted." The permissions granted to DOC by contract provides for a perpetual license that grants the "Oklahoma Department of Corrections the use of the SOFTWARE to manage trust accounts, restitution and canteen operations of all inmates residing at facilities managed and operated by the Oklahoma Department of Corrections. There is no limit on the _____ number of machines or users that can access this SOFTWARE. Oklahoma Department of Corrections may not use this software to process accounts or administer records for benefits of, or for purposes of rendering services to, any other business or agency. This license cannot be transferred, leased, assigned or subleased.~~

~~C.5.17.3. SUPPLIER's system shall interface with inmates' individual accounts in the OBS for only the Bag and Drop Services (Section C.3) and the Package Sales (Section C.4) components. SUPPLIER's system shall interface with the OBS for bulk orders only for the Canteen Store Inventory Items component (Section C.2).~~

~~C.5.17.4. DOC utilizes the OBS as the system of record for all inmates' financial information. OBS consist of two (2) accounting modules: trust accounting and canteen.~~

~~C.5.17.5. OBS updates its inmate data nightly from DOC's Offender Management System (OMS). Because monetary transactional data related to all OBS accounts, including deposits, withdrawals, disbursements, canteen inventory management and point of sales information must be reported to the state treasurer using one common account, these two separate accounting modules process and exchange financial data in both real time and through the utilization of nightly transactional updates. All daily transactional reporting of OBS financial transactions to the state is done through the trust accounting module. For sales directly to an inmate, our current system "locks" the inmate account once the canteen staff enters the inmate's DOC #. No one other than the canteen that has that inmate's account open and locked can process any deposits or withdrawals. That prevents any change to the account balance while we sell to the inmate.~~

~~C.5.17.6. Within the trust accounting module there is a central transactional account that facilitates transactional information between the trust accounting and canteen modules to include the payment of supplier payables, facilitation of canteen module hobby craft sales and canteen. The canteen and trust accounting modules exchange inmate specific account information in real time with all receipts, disbursements, receivables, and payables processed through the trust accounting module.~~

~~C.5.17.7. The canteen module manages canteen inventory and point of sales activity. Canteen inventory is acquired using a purchase order and receiving process.~~

~~C.5.17.8. The collection of state, county and city sales taxes are computed and assessed by the canteen module on all canteen sales transactions to include inmate hobby craft sales which are not considered inventory items but are subject to the collection of state sales tax. The canteen module has adjustable parameters that facilitate the appropriate identification and collection of the various county and city tax rates. The canteen module also supports the identification of taxable and non-taxable inventory items since some items (specifically stamps) are not subject to state sales tax collection. SUPPLIER shall report, collect, and pay sales taxes for the items that they sell directly to the inmate or others to include the bag and drop operation and package sales, as applicable.~~

~~C.5.17.9. The state of Oklahoma has a sales tax exemption for certain disabled veterans. Incarcerated inmates are eligible to apply for and be granted this exemption. When a sales tax exemption is granted by the Oklahoma Tax Commission (OTC), the OBS trust accounting module will classify that the inmate as sales tax exempt. Real time integration between the trust accounting and canteen modules at point of sale ensures sales taxes are not charged to inmates that have an OTC sales tax exemption. SUPPLIER's ordering system for bag and drop services for the CWC's and CCC's and the package sales shall provide similar systems to ensure that sales taxes are not charged to inmates that have this exemption.~~

~~C.5.17.10. The canteen item inventory management process in the canteen module also facilitates the tracking of halal and kosher food items. Restrictions of an inmate from making canteen purchases are recorded in the trust accounting module as an account freeze. This restriction, when implemented, is communicated in real time to the canteen module. The inmate may also receive a canteen restriction that only allows the inmate to purchase hygiene and writing items only. SUPPLIER's ordering system for bag and drop services for the CWC's and CCC's and the package sales shall provide similar systems to ensure orders are limited by any imposed restrictions.~~

~~C.5.17.11. DOC utilizes a privilege level based systems' of incarceration and allowable inmate property matrix. The canteen module designates whether an item can be sold to a specific inmate based upon privilege level as defined by OMS and with real time integration between the OBS trust accounting and canteen modules. The canteen module also defines total weekly inmate canteen spending limits. As an inmate makes a canteen purchase in the canteen module, the system matches the inmates' current available account balance with his/her weekly spending limits to ensure that the inmate does not exceed available account resources and spending limits. It is important to note that this matching must be real time since an inmates' trust account balance can be concurrently increased or reduced by both canteen and trust account transactions. When inmate account limits are reached through transactions by either module, the canteen module will prevent additional sales from occurring. The SUPPLIER's ordering system for bag and drop services for the CWCs and CCCs and the package sales shall provide similar systems to ensure that the inmate has enough funds in their account. SUPPLIER's system shall not have the ability to enforce compliance with custody levels or facility rules.~~

~~C.5.17.12. SUPPLIER shall be required to provide an automated interface between SUPPLIER's canteen system and DOC's Offender Banking System (OBS). SUPPLIER shall pay a fee directly to ATG equal to one (1) % of total sales, on a payment schedule to be mutually agreed upon by the SUPPLIER and ATG. SUPPLIER shall provide an interface to access the OBS trust account controlling data in "real time". Inmate controlling data found in the existing trust account module includes inmate fund balance, authorized spending level, indigent status and other disciplinary and/or financial restrictions or incentives that control how much or what items an inmate may purchase from the canteen.~~

~~C.5.17.13. Any modification and associated cost to the existing OBS system or software resulting from a contract awarded pursuant to this solicitation shall be borne by SUPPLIER and must be operational to the satisfaction of DOC prior to commencement of services.~~

~~C.5.17.14. Any hardware utilized by SUPPLIER must operate in a standard office environment. No special environmental controls/systems will be provided. SUPPLIER shall provide a list of power requirements for the hardware at each location.~~

~~C.5.17.15. Hardware and Software Security Protocols and connectivity requirements/limitations: Data will not be sent in clear text and will be dedicated to its own network. It should have data encryption at rest. Inmate access to the equipment is limited to the user interface. Security software, Operating System and firmware will be updated to ensure security of the Kiosk in a timely manner.~~

~~C.5.18.C.4.15.~~ Performance Measures and Liquidated Damages:

~~C.5.18.1.C.4.15.1.~~ Performance Standards: SUPPLIER will be held accountable for the achievement of certain performance measures in successfully delivering services under this contract. The following performance standards have been deemed most crucial to the success of the overall desired service delivery and shall be used to measure SUPPLIER's performance and delivery of services. SUPPLIER shall ensure that the stated performance standard outcomes are met. When such standard outcomes are not met, liquidated damages may be assessed by DOC. If standard outcomes are not met due to the fault of DOC or the OBS, liquidated damages will not be assessed.

~~C.5.18.2.C.4.15.2.~~ Assessing Damages: DOC's Contract Monitor will provide written notice to SUPPLIER's Representative of all liquidated damages assessed accompanied by detail sufficient for justification of assessment. SUPPLIER may issue a credit in the amount of damages due on the next invoice of the effected component, or SUPPLIER may forward a company check to the Contract Monitor, payable to the Oklahoma Department of Corrections in the appropriate amount, within ten (10) days of receipt of a written notice of demand for damages.

~~C.5.18.3.~~
