

## SW797 ATTACHMENT E- DEVIATIONS

**35. Chassis Specifications-** Specification notes that 9250lb GVWR is minimum. This is only available with diesel engine. The gasoline engine that is specified is on the 9000lb GVWR chassis.

**Option V-Supply 20' T350 with Sliding Doors-** The specification calls for 9250lbs GVWR with the 3.7L Engine. The 3.7L gasoline engine is provided on the 9000lbs GVWR chassis, if they want 9250lbs GVWR they will need to order the 3.2L Diesel Engine.

**Option W- Supply 20' T350 with Bus Style Doors-** Transit Works "Bus Door" is provided by A&M Electric Door (This is what is called for in the specification) A&M doors will not allow their door installed on a Ford Transit with a GVWR less than "10,000lbs". The vehicle in this specification is less than 10,000lbs. Please see the following email from A&M Door on this issue.
