CJIS SECURITY POLICY REQUIREMENTS

The CJIS Security Policy outlines a number of administrative, procedural and technical controls agencies must have in place to protect criminal justice information. Our experience is that agencies will generally have many of the administrative and procedural controls already in place, but will need to implement additional technical safeguards in order to be in complete compliance with the mandate. Public safety agencies procuring technology equipment and services that could be used in hosting or connecting or transmitting CJI data may need to use the check list to make sure that the equipment or the service provider entity will meet the CJIS requirements per the CJIS security Policy 5.5. Appendix D, G shall be referenced and Appendix H will need to be completed depending on the technology considered.
