H.9.1. Vendors can provide pricing for Alternative Fuel Engines that are available. Only Engine Configurations that have been certified by all required Agencies can be submitted under this Section. Several lines have been provided to provide Pricing.

- H.9.1.1. Engine Type: 6.8L V-10 - Gasoline (Type-C) Price: \$ -\$4,500.00 DEDUCT vs. applicable Type-C / Diesel configuration
- H.9.1.2. Engine Type: 6.8L V-10 - Propane (Type-C) Price: \$ +\$4,750.00 INCREASE over applicable Type-C / Diesel configuration
- H.9.1.3. Engine Type: 6.8L V-10 - CNG (Type-C) Price: \$ +\$31,500.00 INCREASE over applicable Type-C / Diesel configuration
- H.9.1.4. Engine Type: ISL - CNG (Type-D (RE)) Price: \$ +\$36,500.00 INCREASE over applicable Type-D (RE) / Diesel configuration
- H.9.1.5. Engine Type: _____ Price: \$ _____
- H.9.1.6. Engine Type: _____ Price: \$ _____

NOTE REGARDING PRICING FOR OPTIONS NOT LISTED AND ALTERNATIVE FUEL ENGINES:

If needed, a separate document may be provided if pricing varies dependent upon Passenger Capacity. Vendors may submit separate documents for each Passenger Capacity model if needed.

2015 OKLAHOMA MINIMUM SCHOOL BUS SPECIFICATIONS

When we are finished a statement will be placed here stating what the effective date will be. It will clearly state that retroactive action is not necessary. Dealers, please work with your manufacturers to determine what date for changes would cause the least burden possible. My expectation is that we determine a date at least 90 days after board approval.

AIR CLEANER

- A. A dry element air cleaner shall be provided.
- B. All diesel engine air filters shall include a latch-type restriction indicator that retains the maximum restriction developed during operation of the engine. The indicator should include a reset control so the indicator can be returned to zero when desired.

AISLE

All emergency exit doors shall be accessible by a 12-inch minimum aisle. The aisle shall be unobstructed at all times by any type of barrier, seat, wheelchair or tie-down, unless a flip seat is installed and occupied. The track of a track seating system is exempt from this requirement. A flip seat in the unoccupied (up) position shall not obstruct the 12-inch minimum aisle to any side emergency exit door.

AXLES

The front and rear axle and suspension systems shall have a gross axle weight rating (GAWR) at ground commensurate with the respective front and rear weight loads of the bus loaded to the rated passenger capacity.

BACK-UP WARNING ALARM

An automatic audible alarm shall be installed behind the rear axle and shall comply with the published Backup Alarm Standards (SAE J994b), providing a minimum of 112 dba, or shall have a variable volume feature that allows the alarm to vary from 87 dba to 112 dba sound level, staying at least 5 dba above the ambient noise level.

BRAKES: GENERAL

- A. The chassis brake system shall conform to the provisions of FMVSS Nos. 105, *Hydraulic and Electric Brake Systems*, 106, *Brake Hoses*, and 121, *Air Brake Systems*, as applicable. All buses shall have either a parking pawl in the transmission or a park brake interlock that requires the service brake to be applied to allow release of the parking brake.
- B. The anti-lock brake system (ABS), provided in accordance with FMVSS No. 105, *Hydraulic and Electric Brake Systems* or No. 121, *Air Brake Systems*, shall provide wheel speed sensors for each front wheel and for each wheel on at least one rear axle. The system shall provide anti-lock braking performance for each wheel equipped with sensors (Four Channel System).

2500 South Meridian • Oklahoma City, OK 73108-1744
