Broom Bear®

Single Engine CNG Alternative Fuel

3600 PSI Composite Fuel Tanks

Conveniently Located Fill Door

Low Emissions - Highly Economical Single Engine

The Elgin Broom Bear is now available powered by compressed natural gas. This means that a popular, commercial chassis, single engine mechanical sweeper is finally available. This rugged, mechanical sweeper is powered by the state of the art Cummins Westport ISL G natural gas engine making the Broom Bear a fully certified 2013 EPA/CARB emission standards single engine street sweeper. The Broom Bear can also be SCAQMD rule 1186 compliant with the optional PM-10 package. With it's three 3600 psi composite fuel tanks, the Broom Bear has a generous 51 gallon diesel equivalent fuel capacity giving a sweeping range even beyond the standard diesel Broom Bear. The Elgin Broom Bear is still tough on dust and debris while being easy on operators, but is now also easy on the environment.

ELGIN Track Sweeper

FOR RACETRACK SWEEPING, CONDITIONING, AND MAINTENANCE APPLICATIONS

The new Crosswind® Specialty Track regenerative air sweeper includes unique features developed for racetrack sweeping, conditioning, and maintenance applications, including a 20,000 CFM-rated blower, a hydraulically-driven, plastic bristle side broom on one side of the sweeper and a high-performance air-blast nozzle on the other side. For remote cleaning, the unit also features a soft wall cleaning attachment and a large jib boom-mounted 8-inch rear vacuum hose for the big jobs. The Crosswind Specialty Track Sweeper can clean a wide, 117-inch path with its side broom and pickup head. With its side air-blast nozzle, debris can be blown off the track for distances up to 50 feet. The sweeper has a generous 8-yard hopper to contain ample track debris and/or a high volume of water.

With its special racetrack additions, this sweeper delivers unmatched operator efficiency and productivity on and off the racetrack.

- 20,000 CFM rated blower
- High efficiency regenerative blast orifice pick-up head
- Dual engine for extra sweeping power
- 117" sweep path
- 240 gallon spray water dust suppression system
- 8 cubic yard hopper
- Dual operator controls
- 70 MPH transport speed
- Top mounted and rear mounted conspicuity lights
- Lifeliner® hopper coating
- Water system valves at each function
- Memory Sweep® to improve productivity

Soft Wall Cleaning Attachment

- Very powerful, uses same 20,000 CFM rated blower system.
- Debris/rubber clean up
- Liquid removal
- 20' light weight hose for easy operator control
- Aluminum vacuum end tube for durability
- Quick-disconnect for quick installation/storage
- Larger rear door wandering hose for general cleaning

Air Blast System

- Very powerful, uses same 20,000 CFM rated blower system
- Works great on areas where jet dryers cannot be used because of heat (i.e. grass, pit road, sweepers)
- Quicker response than jet dryer due to side mount blower and in-cab controls
- Blower volume controlled from inside operator cab
- Adjustable height from operator cab
- Adjustable blower nozzle angle (manual quick-clamp)

Rear Door Decant System

- Sweeper is very efficient at vacuuming water
- Rear door is equipped with a large decant valve and inside debris cage to prevent clogging
- Rear door does NOT need to be opened to drain load

Side Broom

- Hydraulically driven/high torque side broom
- Poly bristle broom construction
- Side tilt and down pressure control from in-cab
- Extended sidebroom reach allows for track safety light clearance
- Pneumatically controlled position to prevent soft wall damage
- Pneumatically controlled down pressure for precise surface contact

Tilt Test

- The Crosswind was tested at the Caterpillar Inc. proving grounds for maximum tilt angle
- An in-cab angle indicator alerts the operator, both audibly and visually for excessive truck tilt angle
- All fluid systems designed and tested not to leak fluids at max sweeping angle

Crosswind® GRS (Glycol Recovery Sweeper)

The versatile high-performance regenerative air sweeper designed for airport applications.

The Crosswind GRS is an ideal sweeper for efficient capture and removal of environmentally damaging glycol and other deicing fluid runoff on airport runways and gate locations with the added versatility of providing general maintenance sweeping airports require. The glycol recovery system does not affect any of the standard sweeping functions, making the unit immediately available after offloading the recovered liquid. This sweeper is a true multi-purpose machine and can perform both the sweep and liquid pickup applications without compromise.

The unique GRS system features:

- An enhanced blower fan with a flow blocker system that temporarily restricts airflow while operating the engine at higher speeds, allowing for the quick pump-off of glycol. This flow blocking system also reduces dust while dumping the debris body, reversing, and transporting the sweeper.
 - An externally-visible liquid level indicator and an in-cab hopper liquid full lamp indicator to monitor glycol capacity and ensure maximum productivity prior to offloading.
 - An anti-slosh baffle at the hopper inlet to prevent accidental glycol escape.
- Elgin's exclusive manual decant system allows liquid mixed with heavy sludge to be pumped off with ease. The unit may be equipped with a hydraulically driven pump off system or a 6" (152 mm) gravity drain.

Pump outlet:

3" (76 mm) pipe to 2.5" (63.5 mm) flexible canvas hose with quick disconnects

Liquid system specifications:

Hopper capacity 750 gallons (2839 l)

Hydraulically driven pump off system in lieu of gravity drain:

Pump capacity 300 gpm (19 lps)

Approximate hopper offload time: 180 seconds
