Description of Amendment:

a. This is to incorporate the following:

1. Please provide the incumbent's pricing on current contract. **Monthly/routine services rate is \$1,625.00 for base and option years. Pre/Post Emergent rate is \$1,875.00 per complex application for base and option years.**
2. Paragraph 4.6.5 states "applying fertilizer 4-6 week intervals" Industry standard is 4-8 weeks depending on rain for example you would not fertilize there had not been ran for 8 weeks. Also, I do not believe the site has a irrigation system...correct? **Section 4.6.5 which states... "Turf shall be fertilized at intervals to promote excellent green color and optimum turf health. Fertilizer application rates and number of applications shall be determined on many factors but generally the Contractor shall properly apply nitrogen fertilizer evenly at one (1) pound of actual nitrogen per 1000 square feet at approximately four (4) week to six (6) week intervals, more or less depending on conditions, while grass is actively growing."** stands as written. Correct, there is **NO** sprinkler/irrigation system.
3. Who's responsibility will it be to cleanup high grass around trailers and vehicles prior to start the contract. If the winner is required to do this could we charge based on an hourly rate per person working. **The owner (OMD) will clean this up one time and once cleaned up, the "winner" will be expected to maintain there after.**

b. All other terms and conditions remain unchanged.
