NURON

ONE CORDLESS PLATFORM

Nuron will redefine the way you work — and directly impact your bottom line.

Whether you're new to Hilti or considering an upgrade to Nuron, this all-on-one platform can maximize your productivity and help take charge of the most demanding projects so you can start and finish jobs faster.

A connected cordless platform to handle the broadest range of light- to heavy-duty construction jobs and projects, Nuron has you covered.

LONGER RUN TIMES

A fully compatible platform that enables optimization of your tool crib, you can count on higher efficiency than corded or gas-powered tools, helping your teams work with **more work-per-charge, more speed** and **less downtime**.

POWER-PACKED PERFORMANCE

The groundbreaking new battery technology packs **unmatched power** and **performance for demanding jobs** like breaking concrete, serial drilling into tough materials, and grinding and cutting metal.

DURABILITY AND SAFETY

All Nuron tools and batteries come with **improved durability** and more **built-in safety features** to help withstand the harshest conditions, keep your crews safe, and reduce risks that contribute to unnecessary costs and delays on your jobsites.

STREAMLINE YOUR TOOL CRIB AND JOBSITE MANAGEMENT

We're here to help simplify your day-to-day. All Nuron tools are designed with **integrated data-driven services** that help maintain tool and battery health while minimizing downtime and the burden of managing repairs.

NURON

HELP STREAMLINE YOUR DAY-TO-DAY

Nuron offers connected tools and batteries for more transparency to your tools and how they're being used, helping you improve tool crib management and jobsite productivity — with even more services and connectivity enabled for Fleet and ON!Track customers.

Hilti Tool Services

Tool Fleet Management
Better control your tools and your costs. We help manage your tools so you can focus on managing your business.

ON!Track Asset Management
Designed to help make it easier to manage your business, tools, and jobsites

In-House Repair Services
Simple to request tool repair services, often with a 1-business day turnaround

Hilti's 20-2-1 Warranty
We stand behind the quality of our tools with the 20-2-1 warranty
Some limitations apply. Contact Hilti for details.

» ADDED NURON BENEFITS

Help eliminate jobsite delays and unnecessary costs while freeing up hours to use where they're needed most — allowing you to boost your efficiency, all on one platform.

BUILT-IN DIAGNOSTICS

- Get alerted when tools need maintenance
- Maintenance alerts to help keep your tools working

BATTERY STATE OF HEALTH

- Quickly gauge charge levels
- Automatic battery health scan and replacement service

TOOL USAGE INSIGHTS

- Last charged location
- Know where and who is using tools
- Identify and locate idle, underused, and hoarded tools

BATTERIES WITHOUT COMPROMISE

HILTI

NURON

THE NURON CORDLESS BATTERY DIFFERENCE

Two additional spring-loaded plugs deliver **twice the power** to your light to heaviest-duty jobs

Shock absorbing bumpers have been added to the outside of the battery for **increased drop protection**

New potted casing **protect electronics** from moisture, dust and other contaminants

Redesigned battery cell holders provide improved heat management to **enable greater performance**

Hilti Nuron cordless batteries not only bring you more connectivity, performance and the flexibility to use the same set of interchangeable batteries for all your tools — they've also been designed to sustain the toughest of jobsites — making your job just a little bit simpler.

With **data-driven insights**, you can make informed decisions for your business and your bottom line

Stored insights **automatically upload** when batteries are charged

Intuitive batteries help you stay ahead by collecting information on **usage, location and health data** while you work

NURON

DSH 600-22 Cut-off saw CUT FASTER, SMOOTHER AND LONGER

Ditch your dependency on gas and experience game-changing power and performance — plus none of the fumes, noise, or delays gas can create — with the Nuron battery-powered DSH 600-22 cut-off saw.

Say goodbye to gas and all the hassles that come with it, including the inability to cut indoors.

- NO fumes or emissions
- NO excessive heat
- NO fuel mixing issues
- NO extra maintenance

You'll also benefit from quieter, lower-vibration cutting, built-in safety with a fast-acting blade brake and better handling and maneuverability with a tool body that is nearly 10 lbs. lighter than like cut-off saws.

With longer runtimes, less maintenance, and more control, the DSH 600-22 is the easy choice for all-day cutting — wet or dry. What are you waiting for?

APPLICATIONS

- **Cutting concrete and masonry** — such as making new openings or trimming blocks to size (max. cutting depth 4- $\frac{3}{4}$ " with 12" blades)
- **Paving** — cutting curbstones, pavers, and asphalt
- **Metalwork** — cutting metal deck, rebar, steel sheet, metal track, and pipes
- **Cutting indoors** — battery-powered, cordless cut-off saws are quieter and fume-free

CUTTING EDGE SPEED AND UNMATCHED RUNTIME

NURON SC 30 WL-22 and WR-22 Wood cutting circular saws

Cut through your work effortlessly with SC 30 WL-22 or SC 30 WR-22 on the all-on-one Nuron cordless platform.

The brushless SC 30 WL-22 circular saw makes production cutting more efficient and less demanding, offering double the runtime in comparison to previous generations. With no more power cords and fewer trips to the charger, you can keep things running smoothly on your jobsite. No matter the blade orientation, you can expect cordless without compromise.

The SC 30 WL-22 has been redesigned to take full advantage of the high power delivered by the Nuron battery and deliver the best performance

versus the long-standing 15A corded blade-left worm-drive saw. With a 2-3/8" cutting depth, longer runtime and superior heat management, you can easily tackle tough all-day jobs.

The newest saw in the Hilti portfolio, the SC 30 WR-22 leaves other saws in the dust. Designed for the everyday grind on the jobsite, this blade-right 7-1/4" circular saw is built to boost your productivity with faster speeds, the best cutting depth and a virtually dust-free cutting experience.

» APPLICATIONS

SC 30 WL-22 & SC 30 WR-22

- **Bevel cuts**—the SC 30 WL-22 can cut at 0–50° angles, and the SC 30 WR-22 at 45° in materials up to 2" or at 50° up to 1.77" thickness
- **Cutting solid wood**—the SC 30 WL-22 and SC 30 WR-22 cut production wood, hardwoods, battens and pressure-treated lumber
- **Cutting wood-based board**—the SC 30 WL-22 and SC 30 WR-22 cut HDO, MDO, plywood and OSB
- **Cross and rip cuts**—the SC 30 WL-22 cuts through wood or plastic
- **Trimming interior finishing board**—the SC 30 WL-22 cuts drywall and sandwich boards

ADVANTAGES

SC 30 WL-22 & SC 30 WR-22

- **Designed for comfortable control**—weighing in under 12 lbs. with a B-170 battery, the rear handle grip makes precise cuts quicker and easier
- **LED light** enhances visibility
- **Virtually dust-free sawing**—by attaching optional adapter for use with a vacuum
- **Highest cutting depth**—the SC 30 WR-22 can cut through three 3/4 in. wood boards in a single pass

THE NEWEST IN
GRINDER SAFETY
TECHNOLOGY

AG 6D-22 Angle grinder with SensTech and 3D ATC

Safety and performance are non-negotiables on the jobsite.

Help minimize downtime while experiencing the ultimate in performance and safety with Hilti's new AG 6D-22 (5" & 6") Angle grinder. Equipped with SensTech and 3D Active Torque Control (ATC), you can cut and grind with more control—making the uncompromising AG 6D-22 one of the world's safest grinders.

In a smaller package and 30% more compact, the AG 6D-22 offers power, comfort and control with an unmatched work per charge. Powered by self-optimizing Nuron batteries, you get twice the cutting speed plus the performance of a 36V grinder on a 22V platform.

APPLICATIONS

- Cutting rebar, pipes and sheet metal
- Weld removal, notching, grinding, deburring and finishing metal surfaces
- Cutting and grinding concrete, masonry, roof tiles or stone

» TECHNICAL DATA

Dimensions (L x W x H)	11.81 x 3.26 x 5.19 in.
Weight according EPTA-Procedure 01/2003 (input)	4.4 lbs. (without battery)
Max. cutting depth	1.81 in.

WHAT IS SENSTECH AND 3D ATC?

Experience a powerhouse of safety and performance with Hilti-exclusive technologies, SensTech and 3D ATC.

SensTech is a patented, touch-activated deadman switch that automatically detects the operator's hand, shutting off the tool and immediately applying a break if a hand is removed

3D ATC kickback control adds another layer of safety, shutting the tool off to reduce risk of injury when it binds or spins abruptly out of its work zone in any direction

APPLICATIONS

- **High-speed fastening**—built for high-speed fastening such as metal deck, stud framing, HVAC, formwork, prefab and glazing
- **Self-drilling screws**—optimized for drilling through metal and driving threads to completion
- **Wood screws**—high-speed cordless impact driver for attaching wood to wood
- **Concrete fasteners**—high-performing and long-lasting runtime ideal for driving concrete screw anchors such as HUS (max. diameter 6 mm)

With all-day performance and the power and speed to finish jobs faster, the SID 6-22 cordless impact driver is designed with a high-efficiency motor and tether-ready for added jobsite safety.

Powered by the Nuron cordless platform, the SID 6-22 enables your team to set fasteners with high speed and efficiency. The interface also enables data-driven services for more transparency to your tools and teams, providing location and idle tool utilization data to help further drive productivity.

The SID 6-22 comes with the performance you need for high frequency fastening, along with built-in safety features to help protect your workforce and reduce risks that contribute to unnecessary costs and delays.

SIW 8-22 ½" IMPACT WRENCH

Speed up your bolting and anchoring with the new Nuron-powered SIW 8-22 ½" impact wrench.

You'll also experience more precision and control thanks to the high torque, improved ergonomics, two speed settings and built-in LED light.

With the increased power, performance and runtime of the all-in-one cordless platform, the SIW 8-22 is the most powerful cordless impact wrench Hilti offers—so you can count on maximum longevity and durability, no matter the job.

» APPLICATIONS

- **Bolting steel**—structural steel connections, pipe flanges, equipment and A325 bolts (½" to 1 5/16" diameter)
- **Setting HUS anchors in concrete**—such as for baseplates, formwork props, handrails and temporary fixtures (½" to ¾" diameter)
- **Lag bolting in wood**—such as for primary and secondary wood structures, wooden roofs or temporary structures (½" to ¾" diameter)

TE 6-22 Rotary hammer

LIGHTER, SAFER, AND STRONGER THAN EVER

Power through bigger, tougher drilling and chipping jobs with the TE 6-22 SDS Plus cordless rotary hammer.

With upgraded power-to-weight ratio, better tool balance, improved ergonomics and more comfort, the TE 6-22 helps make all-day use easy.

Stay protected from uncontrollable spinning with Active Torque Control (ATC) and experience up to 20% less vibration for more comfort and less fatigue with the help of Active Vibration Reduction (AVR). Built with safety in mind, the TE 6-22 comes tether-ready to help prevent and protect against dropping or falling tools.

» APPLICATIONS

- Drilling and hammer drilling in concrete and masonry
- Light-duty chiseling—such as tile scraping, channel cleaning or surface correction
- Occasional drilling in wood and steel with optional quick-release chuck
- Setting anchors and drop-in anchors with optional TE-C bit holder

Simplifying overhead applications, the TE 6-22 also offers the lightest system with an OSHA 1926.1153 Table 1 compliant on-board Dust Removal System (DRS)

TE 30-22

- Drilling anchor holes in concrete and masonry
- Drilling holes for rebar doweling—optimal for serial rebar drilling applications
- Virtually dust-free drilling with Hilti's Dust Removal System (DRS) solutions
- Light-duty chiseling—such as tile scraping, channel cleaning and surface correction
- Occasional drilling in wood and steel (optional quick-release chuck required)

TE 60-22

- Drilling in concrete, reinforced concrete and masonry
- Chiseling openings and channels in concrete or masonry
- Digging holes in earth—SDS Max clay spade and ground rod driver available separately

Conquer the toughest hammer-drilling and medium-duty demolition jobs with the same interchangeable set of 22V batteries powered by the Nuron platform.

Drill faster and experience more work per charge with the TE 60-22 SDS Max combihammer and TE 30-22 SDS Plus combihammer, giving you and your crew the strength, versatility, and simplicity you need to get the job done. With Nuron's data driven services, you'll find tools faster and reduce downtime while having insight into the health of your tools and batteries.

Integrated safety features like Active Torque Control (ATC) and Active Vibration Reduction (AVR) give you the added comfort and control you need while operating your hammer drills, helping to ensure safety while tackling the most demanding drilling jobs.

NURON

DEMOLISH
MORE
WITH LESS

APPLICATIONS & ADVANTAGES

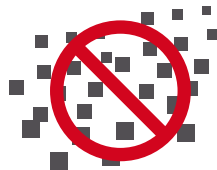

- Breaking up concrete slabs and foundations up to 8" thick
- Floor chasing and cutting channels for pipes
- Removing heavy paving without damaging the slab
- **Cordless breaker without compromise**—delivers the same demolition as the corded version and larger jackhammers, but without all the extra bulk
- **Unprecedented work-per-charge**—demolish half a ton per charge on one pair of revolutionary Nuron B 22-255 batteries
- **OSHA 1926.1153 Table 1 compliant**—when used with a TE DRS-B dust removal system and compatible vacuum cleaner*

TE 2000-22 CORDLESS JACKHAMMER

Ditch the delays — break through faster with the lighter weight, high-powered TE 2000-22 cordless jackhammer.

Freeing you from relying on a main power supply and featuring easy portability, the TE 2000-22 helps remove all the guesswork from your jobsite. Medium-scale and controlled demolition jobs can now get started and finished faster thanks to the TE 2000-22's slimmer tool body at up to 22 lbs. lighter than comparable battery-powered jackhammers.

Keep your jobsites productive and your crews working with more safety and comfort with the help of the TE 2000-22 — experience greater control, higher speeds, improved mobility and less operator fatigue.

Exceptional dust control, cordless convenience

NURON

VC 140-2-22 Vacuum OUR MOST POWERFUL CORDLESS VACUUM

Meet the VC 140-2-22 — a universal cordless vacuum cleaner with the mobility of cordless and the flexibility to tackle most wet and dry jobsite waste cleanup.

OSHA 1926.1153 Table 1 compliant for drilling, breaking, and cutting and grinding concrete with up to 5-inch blades, the VC 140-2-22 boasts 142 CFM, automatic filter cleaning, and 2-gal. capacity. And it's the only cordless SafeSet anchor installation system for the ultimate in anchoring productivity.

Its slim and lightweight design offers ideal ergonomics, allowing you to carry it more comfortably. Paired with the detachable backpack, you can carry it hands-free and better control dust anywhere on the jobsite. For even more convenience, the vac is equipped with remote on/off functionality via a retrofittable Bluetooth module.

HILTI

APPROVED

OSHA 1926.1153
TABLE 1
COMPLIANT

APPLICATIONS

- Dust extraction from grinding, cutting, drilling and dry-coring tools
- Wet and dry vacuum cleaning of construction dust, wood chippings and other jobsite waste

ADVANTAGES

- **Uncompromised cordless performance**—Nuron batteries power the high suction needed for reducing dust exposure during most tasks, including drilling with hollow drill bits
- **Built for mobility**—a compact footprint, a large handle and a weight of just 13 lbs. make this Hilti's most agile jobsite vacuum to date
- **Automatic filter cleaning**—helps to keep suction high and consistent without interrupting your work

Between the Nuron-powered VC 140-2-22 and the soon-to-launch VC 75-1-22, Hilti has your dust control covered.

NURON

WORLD'S FIRST
CORDLESS
SAFESET
SYSTEM

» OUT WITH THE OLD, IN WITH THE NEW

Conventional
installation

1. Drill the hole
2. Clean the hole by blowing out dust twice with compressed air
3. Prepare the hole surface by removing debris with steel wire brushing
4. Blow out loosened dust and debris with compressed air, twice, then again
5. Calculate and inject the exact amount of properly mixed mortar
6. Insert threaded rod or rebar dowel in place

Nuron-powered
SafeSet solution

1. Combined drilling and cleaning—**saving you up to 60% more time**
2. Inject the exact amount of mortar with smart cordless dispenser and volume calculator application—**helping to eliminate mistakes and waste**
3. Insert threaded rod or rebar dowel in place

ATC AVR

Tackle the most demanding anchor applications with the world's first fully cordless SafeSet system, powered by Nuron.

Combining hole drilling and cleaning with guess-free adhesive injection, SafeSet makes anchor installation faster, easier, and safer.

Drill faster and run longer with the top-performing, low-weight TE 60-22 combihammer, clean the hole as you drill with the VC 140-2-22 cordless vacuum cleaner, and take the guesswork out of proper mortar injection from discard to dosing with the HDE 500-22 smart cordless dispenser and volume calculator—all on one battery platform.

TE 60-22

- Up to double the work per charge
- Active Torque Control (ATC) better protects you from uncontrolled rotation of the tool
- Active Vibration Reduction (AVR) helps add comfort against vibration

VC 140-2-22

- ICC-ESR approved with SafeSet system
- OSHA 1926.1153 Table 1 compliant with HEPA filter
- Bluetooth (BLE) enabled features for even easier handling

HDE 500-22

- Intuitive LED indicates when the accurate amount of mortar is dispensed
- Hilti Volume Calculator helps you define and dispense the correct dosage of mortar needed
- Smart discard function makes properly mixed ratio of two-part mortar correctly, regardless of adhesive or tube size
