» PRECISION REBAR CUTTING, without compromise

NURON

NRC 6-22 Rebar Flush Cutter

Experience safer, more efficient rebar cutting with the low-spark NRC 6-22 Rebar flush cutter. This user-friendly tool enhances comfort through its ergonomic design and helps maximize productivity with its extended battery reach, and improved blade durability.

SHOP NOW

Cold-Cut Technology

Cold-cut blades reduce sparks on the job, helping to minimize the risk of fire or injury and reducing the need for “fire watch” on some projects.

Efficient Cutting

Achieve high-quality cuts in up to #8 rebar with less effort.

Uncompromising Performance

Backed by the power and reach of the Nuron cordless platform.

Streamline operations and help safeguard your teams and projects with the NRC 6-22's cold-cut technology for faster, safer, and more cost-effective rebar cutting.

HILTI

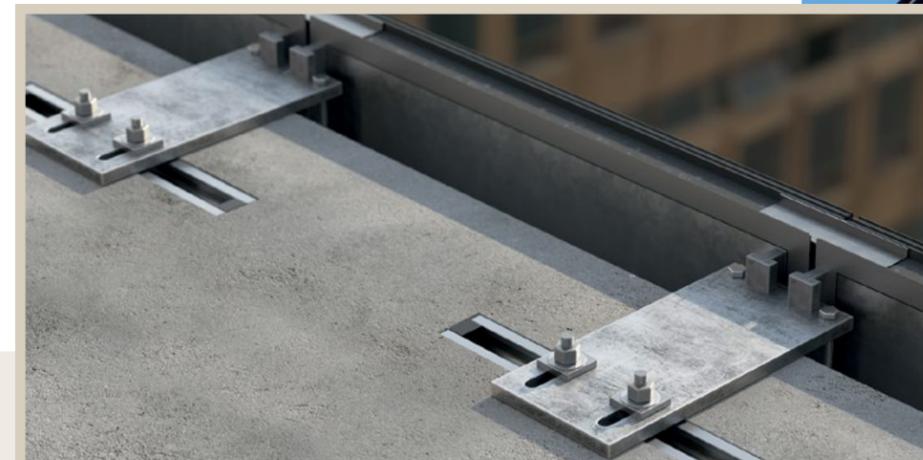

Design your FAÇADE CONNECTIONS with software built for you

PROFIS Engineering Façade

COMING SOON

Simplify your façade connection design with the latest addition to our PROFIS Engineering software suite — Façade.

As part of the PROFIS Engineering suite, Façade inherits features like cloud-based file storage and an undo button enabling more efficient design. Additionally, there are new premium features that help elevate your productivity such as importing your loads from Excel and running multiple load combinations in one file, or enabling tolerance adjustments in multiple directions with slotted holes saving significant time from repetitive connection designs.

HIGHER PERFORMING CONNECTIONS

for peace of mind with value engineering.

Jobsite mobility to **BOOST PRODUCTIVITY**

NURON DGH 130-22 Cordless Concrete Grinder

Experience next-level grinding efficiency with the first-of-its-kind DGH 130-22 Cordless concrete grinder. This tool combines ergonomic design, advanced safety features, and the power and speed of our high-performing Nuron battery platform to deliver concrete grinding and finishing with added comfort and control. Cordless operation means less time spent searching for or setting up a power source and more time getting the job done.

Ergonomic Design

Slimline grip and padded head for prolonged comfort.

Safety Innovation

Drop-detection technology helps safeguard the user and working area.

High Performance

Cordless tool offers the same performance as the corded one.

System Advantage

Optimize performance, efficiency, and dust control when used as a cordless system that includes the DGH 130-22, SPX Universal-A Cup-Wheel, and VC 4X-22. A fully integrated system designed to deliver ultimate productivity to your concrete grinding, polishing, and smoothing.

SHOP NOW

NURON VC 4X-22 Cordless Vacuum

Clean up quicker with maximized suction and productivity. Capture 99.9% of dust with the new VC 4X-22 Cordless vacuum. Deliver better air quality with two tank sizes and Bluetooth technology, catering to your specific requirements without the hassle of cords so you don't sacrifice safety for productive workflow.

SHOP NOW

Choose the Tank Size You Need

VC 4X-22

T8 (8 Liter Capacity)

T8 Applications

- Concrete drilling
- Spot grinding
- General cleaning

T15 (15 Liter Capacity)

T15 Applications

- Extensive concrete drilling
- Consistent concrete grinding
- General cleaning
- Wood cutting

NURON ST 2000-22 Cordless Metal Screwdriver

Experience more seamless, efficient fastening without loud generators or the hassle of cords with the new Nuron-powered ST 2000-22 Cordless Metal Screwdriver. Ideal for metal deck fastening, this screwdriver is designed to help your team do more in less time, with less waste.

Productivity Without Cords

Nuron tools and batteries help you tackle tough tasks without cables, offering higher performance across applications.

Precision Fastening

The brushless motor and adjustable clutch help ensure proper self-drilling screw installation—eliminating potential rework.

Comfort Meets Performance

Eliminate single screw installation and deliver more comfort to strenuous fastening with height-adjustable handles.

Beat Fatigue

Minimize fatigue with the easier-to-handle, slim “inline grip,” helping your team work longer and more comfortably.

ENHANCE HEALTH AND SAFETY for your workforce

Anually, approximately 1% of construction workers suffer a fatal injury, the highest rate in any industry.* The welfare of construction workers is paramount to ensuring a successful and safe jobsite. Driving safety efforts to reduce accidents and injuries goes beyond updating equipment and following regulations; it requires more knowledge and resources to be readily available to those in the industry.

Lack of awareness and knowledge can lead to more accidents, injuries, and excessive physical labor. At Hilti, we pride ourselves in providing innovative tools to help keep your jobsites safer, helping lead to more productivity and less risk, but our efforts don't start and end with our tools—they extend beyond that.

From online training to video and in-person tool tutorials, our safety resources help equip you with the keys to maintaining a safer working environment.

Toolbox Talks

Identify the skills and knowledge needed to prevent accidents while using tools on the jobsite.

- Power Tool Safety Instructions
- Silica Dust
- Laser Scanning and Measuring

[Learn More >](#)

Jobsite Visits

Our field team members travel out to jobsites to show workers how to safely use tools. These resources are unique in our industry and invaluable at a time when we have a less skilled and experienced workforce due to labor shortages. Contact your account manager or reach out to our customer service team at 1-800-879-8000.

BX 4-22 Nails

Specifically designed to fit the BX 4-22 angled magazine and penetrate deeper into base materials with longer available lengths.

Increase stick rate by **10%**

Stay informed and a step ahead on the jobsite with smart features, safety enhancements, and services from the Nuron battery platform:

Nail Refill Indicator

A 2-step nail refill indicator.

Reduced Recoil

A safer, more comfortable user experience.

More Sustainable

Redesigned nail strips that reduce plastic usage by ~6%, eliminating up to 4,000 lbs of plastic used annually.

Our highest visibility laser with new, powerful laser diodes to produce brighter and sharper lines for improved accuracy, even at long-range.

First laser on the Nuron all-on-one cordless platform.

Elevate precision and **PERFORMANCE**

NURON PM 50 MG-22 Laser Level

Level up your measuring efficiency with the revolutionary PM 50MG-22 Laser leveling tool that's helping set new standards in layout by simplifying processes, allowing your teams to focus on quality and speed.

Increased Working Range

Reach greater operating distances of up to 262ft with the laser level, and up to 427ft with the laser level and laser receiver.

Precision Alignment

Simplified setup with micro-adjustment pivoting base for precise alignments up to 30 degrees.

Durability

Enhanced drop resistance from integrated shock absorbers.

PMA 32 Laser Receiver

Increase laser level accuracy when used with the PMA 32 Laser receiver, detecting green laser lines over longer distances and optimized for suspended ceiling applications with magnets on top of the receiver.

Upgrade to a more reliable, efficient way to layout your projects and help simplify your processes, reduce costly errors, and deliver higher quality with quicker setups and fewer re-measures.

Cut and crimp with **COMPACT POWER**

NURON NUN 10K-22 Hydraulic Pump

Take on the toughest overhead and underground crimping and cutting with our new NUN 10K-22 Hydraulic pump with 10,000psi. Its durability and lightweight design help ensure you can complete jobs with more safety and efficiency.

Compatible with industry-standard single phase hydraulic hoses and connection ends, the NUN 10K-22 Hydraulic pump packs power and performance into a compact system to complete your overhead and underground jobs.

SHOP NOW

Keep the NUN 10K-22 and your other Hilti tools by your side when you need them with our trusted warranty and repair services.

Utilize the Bluetooth-connected remote to work at safer distances when the project demands it.

2.7X LIGHTER AND 1/3 OF THE SIZE OF OTHERS IN ITS CLASS

FASTER FIRESTOPPING

on the deck

CFS CID-U Universal Cast-In Sleeve

Save time on the deck and experience simpler, safer installation with the new CFS CID-U Universal cast-in firestop sleeve. With its comprehensive design for metal and plastic piping, the CFS CID-U offers easier height adjustment, helping you get ready for inspection before the pour. By eliminating the need for taping and cutting, this new device can minimize rework, helping increase efficiency.

[SHOP NOW](#)

Easier Installation

Eliminate steps and the need for experts to install your firestop on deck with the simplified clickable adjustment and visible height markers.

Simplified Portfolio

There is no need to stress over couplers and extenders. With the new universal sleeve, simply adjust the sleeve's height on the jobsite. Take advantage of our prefabrication services to have what you need for installation on day one.

HILTI

WEDGE STRENGTH, drop-in convenience

HDI-(P) TZ Drop-in Anchor

Elevate your productivity and safety for drop-in anchor installation with the new HDI-(P) TZ Drop-in anchor. With the strength of a wedge anchor and the convenience of a drop-in, this innovative solution has Hilti's highest drop-in anchor holding value and is ICC-ES approved for both cracked and uncracked concrete applications, helping you cover a variety of requirements.

Key Performance Benefits

- A streamlined system solution that includes the tool, accessories, and anchor.
- Helps ensure code compliance and seismic approvals previously lacking in drop-in anchors with a full portfolio catering to various slab types, including hollow core, post-tension, standard, and concrete-over-metal deck slabs.
- Reduces total overhead installation time by up to 20% with less energy needed for setting and higher load capacity.
- Improved ergonomics through easier and faster setting, without strain and fatigue.

[SHOP HDI-P TZ](#)

2-In-1 Setting Tool

Maximize drop-in anchoring productivity when you use our 2-in-1 drilling and setting tool, allowing you to drill holes precisely to the desired depth without the need to change tools. With up to 50% **FASTER PERFORMANCE** than traditional overhead hammering methods and a large rubber grip for easier handling, this versatile tool helps you streamline and simplify installation.

HILTI

Increase transparency and cost control for your **TOOL CRIB**

Revolutionize tool management for all construction trades with Hilti's comprehensive tool fleet program, empowering you to focus on your business while we handle tool maintenance and procurement complexities. With Hilti Tool Fleet Management, enjoy hassle-free tool access with fixed monthly rates, and all-inclusive repairs for uninterrupted workflow. Embrace a circular approach to tool utilization, reducing waste and environmental impact while maximizing your business value and operational streamlining.

With a wide variety of over 100 high-performing Nuron tools available on Fleet, you can harness the power of our all-on-one platform while helping streamline your processes, from procurement to maintenance. Experience greater cost control and transparency, standardized safety, and enhanced productivity by letting us partner with you to help maximize the value of your projects with the Hilti Tool Fleet Management.

[LEARN MORE](#)

HOW FLEET MANAGEMENT CAN HELP YOUR CONSTRUCTION BUSINESS

Optimized Tool Crib

Our productivity consultants will help uncover hidden costs, optimize your tool crib, and streamline tool crib management processes.

Increased Productivity

Set your teams up with the latest high-performing tools and get faster, free repairs, as well as loaner tools so your project keeps running.

Extra Flexibility

Take advantage of the Tools On Demand service to cover short and medium-term peak demands and specific project needs.

Better Cost Control

Forget large, up-front investments, improve budgeting with predictable monthly fees and help simplify cost-allocations with custom invoices.

HILTI

Jobsite ESSENTIALS

Investing in tools that prioritize your comfort and convenience can boost productivity on the jobsite. When you focus on innovation and practicality, you can achieve more efficient task completion. Hilti's 22V Nuron all-on-one cordless platform isn't just about tools; it's about empowering you to reach new heights on your projects. With Nuron, you're gaining more than just power and performance — you're eliminating the hassle of cords while delivering longer runtimes and more work per charge, day after day.

Comfort and Convenience

In the construction industry, comfort and convenience are seldom synonymous, but these products are engineered with user-friendly features to provide both on the toughest jobsites.

Enhanced Productivity

Keep your jobsite moving and support smoother operations when incorporating these products into your tool crib. These portable solutions help you tackle tasks regardless of location or potential roadblocks.
