- Turnkey solutions with value-added offerings including design and reconfiguration services, project management, installation, maintenance, and off-site system storage and staging

Who is Spacesaver?

We are Problem Solvers & Innovators

Spacesaver has been a leading manufacturer in Wisconsin, USA for 50+ years and is 100% employee-owned.

How We Began

The concept of High-Density Mobile Shelving was introduced to the USA in 1972 by a small team in Fort Atkinson, Wisconsin to help companies save space. Since then, our in-house teams have developed and manufactured a variety of innovative storage products designed to help clients better manage their time, space, and security.

What We Do

We design and manufacture fully integrated storage solutions for libraries, museums, warehouses, police departments, educational institutions, the military, and more. We've installed more than 400,000 projects in the United States, Canada, and around the world. That's nearly a half million problems we've solved!

Why We Do It

We give people the space and the tools they need to do their jobs in a way that makes them safer, more productive, and more efficient. We're proud that our products help create better spaces to learn, to protect, to heal, and to grow.

Where We are Now

Today, team members at Spacesaver's 300,000-square-foot manufacturing facility make products that save time, save space, and promote security for clients all over the world. We employ more than 400 full-time team members in our manufacturing and administrative divisions, and the expertise and hard work of our people are evident in the products that we design, build, and ship every day.
